Hi,

Can one of you have a look at the acreage and let me know?

Please let me know if you get this, looks like they are waiting on answer.

thanks

Shannon,

Is there someone who can respond to Christina's questions? Thanks.

Rich

Hi Rich,

I have two follow up questions on the BLM National Monuments response (see attached).

To determine the current total acreage of a monument on the list, do the "number of acres at enactment" (H) column and the "current non-federal acreage" column (J) need to be added together? I wanted to clarify so that a correct tally of total current acres can be determined.

Also, in cases where the current federal acreage has changed (captured in column "i"), I think that we would add this column with "current non-federal acreage" column (J), to tally the total current acres. Is that correct?

Christina

| BLM     | Kasha-Katuwe Tent Rocks National Monument   | New Mexico | Santa Fe   | 2001 | Antiquities Act | 4 148.00     | 4 645        | 757    | January 17 2001: Located on the Pajarito Plateau in north central New Mexico the Kasha-Katuwe Tent Rocks National Monument is a remarkable outdoor laboratory offering an opportunity to observe study and experience the geologic processes that shape natural landscapes as well as other cultural and biological objects of interest. The area is rich in pumice ash and tuff deposits the light-colored cone-shaped tent rock formations that are the products of explosive volcanic eruptions that occurred between 6 and 7 million years ago. Small canyons lead inward from cliff faces and over time wind and water have scooped openings of all shapes and sizes in the rocks and have contoured the ends of the ravines and canyons into smooth semicircles. In these canyons erosion-resistant caprocks protect the softer tents below. While the formations are uniform in shape they vary in height from a few feet to 90 feet and the layering of volcanic material intersperses bands of grey with beige-colored rock. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Geologic Resources</b><br>Cultural Resources<br>Biological Resources   |
| BLM     | Mojave Trails National Monument             | California | Needles    | 2016 | Antiquities Act | 1 600 000.00 |              | 0      | February 12 2016: The Mojave Trails area of southern California is a stunning mosaic of rugged mountain ranges ancient lava flows and spectacular sand dunes. It is a landscape defined by scarcity and shaped by travel. The area exemplifies the remarkable ecology of the Mojave Desert where the hearty insistence of life is scratched out from unrelenting heat and dryness. This punishing environment has also forged the unique human history of the area from ancient settlements uprooted by a changing climate to the armies of General George S. Patton Jr. as they trained for battle in North Africa. With historic American trading routes trails followed by Spanish explorers a transcontinental rail line and the Nation's most famous highway the Mojave Trails area tells the American story of exploration migration and commerce. The Mojave Trails area is an invaluable treasure and will continue to serve as an irreplaceable national resource for geologists ecologists archaeologists and historians for generations to come. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. | BLM                     | Organ Mountains-Desert Peaks National Monument         | New Mexico | Las Cruces   | 2014      | Antiquities Act | 496 330.00 |  | 77 008    | May 21 2014: In southern New Mexico surrounding the city of Las Cruces in the Rio Grande's fertile Mesilla Valley five iconic mountain ranges rise above Chihuahuan Desert grasslands: the Robledo Sierra de las Uvas Doña Ana Organ and Potrillo Mountains. These mountain ranges and lowlands form the Organ Mountains-Desert Peaks area. The Organ Mountains-Desert Peaks area is important for its ruggedly beautiful landscape and the significant scientific historic and prehistoric resources found there. The abundant resources testify to over 10 000 years of vibrant and diverse human history of many peoples. Objects left behind by this multi-layered history and spread throughout this geologically and ecologically diverse landscape enhance the experience of visitors to the area and represent a vital resource for paleontologists archaeologists geologists biologists and historians. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. | BLM                     | Pompeys Pillar National Monument                       | Montana    |              | 2001      | Antiquities Act | 51.00      |  | 0.00      | January 17 2001: Pompeys Pillar National Monument is a massive sandstone outcrop that rises from an almost two-acre base on the banks of the Yellowstone River 150 feet toward Montana's Big Sky east of Billings. The monument's premier location at a natural ford in the Yellowstone River and its geologic distinction as the only major sandstone formation in the area have made Pompeys Pillar a celebrated landmark and outstanding observation point for more than eleven thousand years of human occupation. Hundreds of markings petroglyphs and inscriptions left by visitors have transformed this geologic phenomenon into a living journal of the American West. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. | BLM                     | Rio Grande del Norte National Monument                 | New Mexico | Taos         | 2013      | Antiquities Act | 242 555.00 |  | 68 020.00 | March 25 2013: In far northern New Mexico the Rio Grande Wild and Scenic River flows through a deep gorge at the edge of the stark and sweeping expanse of the Taos Plateau. Volcanic cones including the Cerro de la Olla Cerro San Antonio and Cerro del Yuta jut up from this surrounding plateau. Canyons volcanic cones wild rivers and native grasslands harbor vital wildlife habitat unique geologic resources and imprints of human passage through the landscape over the past 10 000 years. This extraordinary landscape of extreme beauty and daunting harshness is known as the Rio Grande del Norte and its extraordinary array of scientific and historic resources offer opportunities to develop our understanding of the forces that shaped northern New Mexico including the diverse ecological systems and human cultures that remain present today. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. | BLM                     | San Juan Islands National Monument                     | Washington | Lopez Island | 2013      | Antiquities Act | 970.00     |  | 0.00      | March 25 2013: Within Washington State's Puget Sound lies an archipelago of over 450 islands rocks and pinnacles known as the San Juan Islands. These islands form an unmatched landscape of contrasts where forests seem to spring from gray rock and distant snow-capped peaks provide the backdrop for sandy beaches. Numerous wild life species can be found here thriving in the diverse habitats supported by the islands. The presence of archeological sites historic lighthouses and a few tight-knit communities testifies that humans have navigated this rugged landscape for thousands of years. These lands are a refuge of scientific and historic treasures and a classroom for generations of Americans. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Diverse Habitats</b><br><b>Historic Lighthouses</b><br><b>Native American Sites</b><br><b>Wildlife</b>  |  |
| BLM & US Forest Service | Sand to Snow National Monument                         | California | Palm Springs | 2016      | Antiquities Act | 154 000.00 |  | 0.00      | February 12 2016: The Sand to Snow area of southern California is an ecological and cultural treasure a microcosm of the great geographic diversity of the region. Rising from the floor of the Sonoran Desert to the tallest peak in southern California the area features a remarkable diversity of plant and animal species. The area includes a portion of the San Bernardino National Forest and connects this area with Joshua Tree National Park to the east knitting together a mosaic of spectacular landscapes stretching over 200 miles. The mountain peaks of the Sand to Snow area frame the northeastern reach of Coachella Valley along with the Santa Rosa and San Jacinto Mountains National Monument to the south. Home to desert oases at Big Morongo Canyon and Whitewater Canyon the area serves as a refuge for desert dwelling animals and a stopover for migrating birds. The archaeological riches of the Black Lava Buttes and the historical remains of mining and ranching communities tell of past prosperity and struggle in this arid land. The unbroken expanse is an invaluable treasure for our Nation and will continue to serve as an irreplaceable resource for archaeologists geologists and biologists for generations to come. BLM resources objects and values are defined through management plans. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: human history of the area, geology, plant and wildlife species diversity, desert riparian habitats, threatened and endangered plant and animal species; recreational opportunities, scientific research, and other studies.</b> |  |

| BLM | Sonoran Desert National Monument              | Arizona | Phoenix    | 2001 | Antiquities Act | 486 149.00 |  | 10 000     | January 17 2001: The Sonoran Desert National Monument is a magnificent example of untrammeled Sonoran desert landscape. The area encompasses a functioning desert ecosystem with an extraordinary array of biological scientific and historic resources. The most biologically diverse of the North American deserts the monument consists of distinct mountain ranges separated by wide valleys and includes large saguaro cactus forest communities that provide excellent habitat for a wide range of wildlife species. The monument's biological resources include a spectacular diversity of plant and animal species. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. | BLM | Upper Missouri River Breaks National Monument | Montana | Lewistown  | 2001 | Antiquities Act | 377 346.00 |  | 120 475.00 | array of biological geological and historical objects of interest. From Fort Benton upstream into the Charles M. Russell National Wildlife Refuge the monument spans 149 miles of the Upper Missouri River the adjacent Breaks country and portions of Arrow Creek Antelope Creek and the Judith River. The area has remained largely unchanged in the nearly 200 years since Meriwether Lewis and William Clark traveled through it on their epic journey. In 1976 the Congress designated the Missouri River segment and corridor in this area a National Wild and Scenic River (Public Law 94-486 90 Stat. 2327). The monument also encompasses segments of the Lewis and Clark National Historic Trail the Nez Perce National Historic Trail and the Cow Creek Island Area of Critical Environmental Concern. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports. Including: Upper Missouri National Wild and Scenic River (149 miles)</b><br><b>Lewis and Clark National Historic Trail</b><br><b>Nez Perce National Historic Trail</b><br><b>6 Wilderness Study Areas</b><br><b>1 Area of Critical Environmental Concern</b><br><b>Judith Landing Historic District</b><br><b>2 National Register of Historic Places Listed Homesteads</b><br><b>Diverse Wildlife Species</b><br><b>Diverse Recreational Opportunities</b><br><b>Biological</b><br><b>Geological Resources</b><br><b>Historical Resources</b><br><b>Prairie Dog</b><br><b>Bald Eagle</b><br><b>Sage Grouse</b><br><b>Bighorn sheep</b><br><b>Elk</b><br><b>Mule Deer</b><br><b>Riparian Values: Woodland Forests</b> |
| BLM | Vermilion Cliffs National Monument            | Arizona | St. George | 2000 | Antiquities Act | 279 568.00 |  | 14 121     | November 9 2000: Amid the sandstone slickrock brilliant cliffs and rolling sandy plateaus of the Vermilion Cliffs National Monument lie outstanding objects of scientific and historic interest. Despite its arid climate and rugged isolation the monument contains a wide variety of biological objects and has a long and rich human history. Full of natural splendor and a sense of solitude this area remains remote and unspoiled qualities that are essential to the protection of the scientific and historic objects it contains. The monument is a geological treasure. <b>BLM resources, objects and values are further defined through management plans and/or manager's reports.
